

Your Logo Here

Welcome to "your name here"

Be known by the company you keep.

"Your company background here".

Unique satellite solutions for your unique needs.

We at "your name here" understand that every industry and business has its own communication challenges, needs and requirements. So our approach is far more flexible than the one-size-fits-all plans offered by many other satellite broadband providers. We prefer to get to know you, your business and how you want to communicate with your customers, employees and other audiences before we recommend a system.

"Your name here" brings affordable broadband access and corporate data services to all types of organizations, including rural and underserved business locations. If your needs require you to take your broadband with you, we offer mobile solutions. And no matter where you are, our satellite Internet system is the most comprehensive backup solution for business continuity.

Customer service from actual "your name here" people.

In today's marketplace, it's rare for a company to deliver on its customer service promises.

But at

"your name here", we put our money where our mouth is. Instead of having to deal with the frustration of trying to resolve a technical issue through an off-shore customer service rep, our customers talk directly with "your name here" personnel. We offer 24/7 tech support from real live human beings—"your name here" experts that work at our "your name here" offices.

Business-grade equipment designed for, well, business.

Why use a residential satellite Internet company to conduct your business when there's "your name here"? Not only are our dishes larger and more powerful than the competition, but the infrastructure, components and capabilities of our network are commercial-grade and customizable to meet your unique needs. And it's all powered by the award-winning iDirect VSAT platform.

Connectivity with confidence.

At "your name here", redundancy is a way of life. We recognize the trust you place in us, and we take that responsibility seriously—from our spare 6.3m earth station to our dual generators and diverse path fiber connections. Our engineers may hope for the best, but they plan for the worst.

Our commitment to quality over quantity.

We know that reliable, fast and affordable satellite Internet not only plays a crucial role in your organization's infrastructure, but in your overall success. That's why we're here 24/7 to deliver you the absolute best in IP-based satellite communications. And unlike our competitors, we never oversubscribe our network. Never – that's a promise.

*FYI -
ARRA Broadband
available for
ISP Backhaul,
E-Rare and
Healthcare!
