Disaster Response

It's the aftermath of a disaster.

The last thing you should be searching for is an Internet connection.

After any devastating event, local telecommunications disruptions are common. But when you're a first responder, communications failure is not an option. Nor is waiting for traditional infrastructure to be repaired. That's why you need reliable broadband satellite Internet from "[your name here](#)". Our system isn't just designed to meet your communication requirements and unique challenges, but ultimately, to save lives.

VSAT solutions from "[your name here](#)". For confidence when it matters most.

In routine emergency preparedness drills or in actual disaster response, high-speed communication and reliable access to information are critical. Which is why you need a high-speed, low-latency VSAT system that supports a variety of applications including email, fax, VoIP, streaming data and video. Whatever your requirements, we'll help customize a system that's right for you.

The best equipment to withstand the worst conditions.

Unlike companies that sell consumer-grade equipment to commercial customers, all "[your name here](#)" solutions are business-grade. Our packages work in extreme conditions and are easy to maintain, transport and deploy. Whether you choose the turnkey mobile communications trailer or the SkyPortable flyaway package, you'll get a system that is self-contained and requires little more than the push of a button for easy setup. They're designed to establish a communications link in less than 10 minutes—because in disaster response, every second counts.

Key benefits of a "[your name here](#)" VSAT system:

- Reliable Internet in the toughest environments
- Ultra low-latency data transmission
- Committed Information Rate (CIR) guarantees speed
- Rugged, business-grade equipment
- Fast, easy setup and breakdown
- Customizable to meet your communication needs
- 24/7 in-house tech support
