

Your Logo Here

Internet Café

In many parts of the world, the Internet Café plays a key role in the local communications infrastructure.

We should know. We've been working behind the scenes, providing service to cafés for years. Whether you have an established business, or you are thinking of starting a new one, "your name here" can help you reach your goals. And because the backhaul is done via satellite, the café can be anywhere.

Turnkey solution.

We provide a turnkey solution, with all billing and administration handled by "your name here", with no additional equipment at your location. We take care of the credit card transactions with the end user, and you receive a percentage of the revenue.

Full interoperability.

The "your name here" Point-to-Multipoint (PTMP) solution is fully compatible with any end user site distribution architecture. Our PTMP solution works well with fixed (wired) networks as well as wireless (Wi-Fi or WiMAX). We'll even help you design it.

Easy and safe.

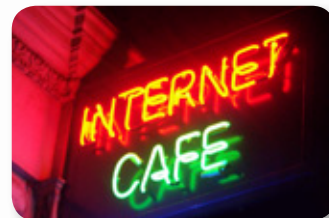

When the end user accesses the Internet, they are taken first to a secure login and payment page, branded with your logo. It takes only a minute to sign up, and no special software is required. If you have more than one location, we'll make your customer accounts portable.

Customized for you.

Choose the rate plans offered and the percentage you earn. Get additional access for your offices. You can even sell pre-paid cards to your customers, if they prefer not to use a credit card.

Backed by "your name here".

We're "your name here", and we're here 24/7. Our customers rely on us to provide high quality solutions in some of the most remote locations on Earth. We'll be with you every step of the way.

To learn more about "your name here" or about our flexible, customized service plans, visit "your name here".com or call (000) 000-0000
